

Introduction	7
What is Ubuntu	7
The purpose of this book	8
A note on repetition	8
Errata	8
Part 1 – The Launcher	10
Use the launcher to open and close applications	11
Use keyboard shortcuts with the launcher	12
Pin and Unpin applications to the launcher	13
Change the order of the icons on the launcher	14
Change the size of the launcher	15
Use keyboard shortcuts to maximize and minimize windows	16
Use ALT+TAB to switch between running applications	17
View all keyboard shortcuts at once	18
Configure the launcher with the unity tweak tool	19
Part 2 – The Dash	20
Summon the dash	21
Search from the dash	22
Filter results with dash searches	23
Use lenses for better dash searches	24
Disable online search results in the dash	25
Disable dash search history	26
Use the heads-up display (HUD) to access menu commands	27
Configure the dash with Unity Tweak	29
Part 3 – Displays	30
Change display resolution settings	31
Change screen lock settings	32
Change the theme	33
Part 4 – User Accounts	34
Lock the screen	35
Switch Users	36
How to log off	37
How to restart	38
How to shut down	39
Create a standard user account	40
Create an administrator account	41
Modify user accounts	42
Delete user accounts	
Part 5 – Nautilus File Manager	44
Five ways to launch Nautilus	45
Use breadcrumbs for navigation	46
Find your home folder	47
Use the sidebar for navigation in Nautilus	48
Use different views to sort files	49
Create new folders	50

Rename files and folders	51
Copy files and folders	52
Move files and folders	53
Delete files and folders	54
Recover deleted files and folders	55
Set the default printer	56
Set default programs	57
Part 6 – Disks and removable media	58
Access removable media	59
Format removable media	60
Check file and folder size	61
Create data discs	62
Burn image files to disc	63
Eject removable media devices	64
Use the disks utility to manage removable media	65
Create a bootable USB flash drive	66
Configure automatic backups	67
Part 7 – Networking	69
Find the IP address from the GUI	70
Find the IP address from the command line	71
Find the MAC address from the GUI	72
Find the MAC address from the terminal	73
Find the computer's host name	74
Find the default gateway from the GUI	75
Find the default gateway from the command line	76
Disable a network connection	77
Assign a static IP address	78
Release and renew a DHCP IP address	79
Find wireless networks	80
Connect to a wireless network	81
Connect to a hidden wireless network	82
Set the home page in Firefox	83
Create bookmarks in Firefox	84
Create tabs in Firefox	85
Delete browsing history	86
Reset Firefox	87
Use the ping utility to diagnose network connections	88
Use nslookup to test your DNS server	89
Part 8 – Installing and Managing Software	90
Finding Software with the Ubuntu Software Center	91
Install applications with software center	92
List installed software	93
Uninstall applications from the software center	94
Install deb packages with software center	95
Use Synaptic to install software	96
Install software from the command line	97
Uninstall software from the command line	98

Part 9 – System Monitor **99**

Launch system monitor	100
View resource usage with system monitor	101
Kill a process in system monitor	102

Part 10 – The terminal **103**

Launch the terminal	104
Use command completion	105
Use command history	106
Change the working directory	107
List files and directories	108
Copy and move files from the command line	109
Delete files and folders from the command line	111
